West Nile Virus Identified in 12 Mosquito Samples Collected in Barnstable, Middlesex, and Suffolk Counties

The Massachusetts Department of Public Health has identified 12 West Nile virus positive mosquito samples collected in Barnstable, Middlesex and Suffolk Counties. The populations of mosquito vectors that transmits WNV and EEE are above average and increasing due to intense regional precipitation events and continued warm weather. Avoid mosquito bites by using EPA approved repellents, appropriate clothing and avoiding peak mosquito activity between dusk and dawn. Remove standing water by emptying containers and tarps. Check your risk levels throughout the season by visiting the State interactive website at:

<https://www.mass.gov/infodetails/massachusetts-arbovirus-update>

Please review the 2021 MDPH Surveillance and Response Plan for updates to risk levels and risk messaging.

<https://www.mass.gov/doc/2021-arbovirus-surveillance-and-response-plan/download>

Establish good mosquito avoidance habits now:

- Teach children to be aware of mosquito activity around them and avoid it
- Pick a repellent with an EPA-approved active ingredient
- Use long sleeves to cover up when possible
- Remove standing water to help reduce mosquito populations
- Repair screens

If you should have any questions, please call us at the Health Division Office at 508 862-4644.

Community Meeting on Downtown Hyannis Zoning Revision

The proposed Downtown Hyannis Zoning Revision and a draft map of the proposed Districts, as well as additional information can be found on the Town's [Downtown Hyannis Zoning Revision webpage](#).

The zoning for downtown Hyannis is proposed to be revised, with a particular focus on residential and mixed-use development that responds to local context through size, form, placement, and design considerations.

On Monday, August 2, 2021 at 6:00 PM Planning and Development staff will hold a virtual Community Meeting on proposed revisions to the zoning regulations and zoning map in Downtown Hyannis. The purpose of this meeting is to present the proposed amendments, discuss the potential impact on development downtown, and how the proposal varies from the current zoning. Please find details for joining the meeting below:

Town Manager Mark Ells' Community Update

In his latest [Community Update](#), Town Manager Mark Ells addresses the Town Council's action at two recent meetings to adopt significant ordinances for Sewer Assessments and Accessory Dwelling Units (also known as ADUs). He encourages you to watch the Town Council meetings and read the ordinances for yourselves to become familiar with them. The next Town Council meeting is a Special Meeting on August 5th and will feature a Workshop on the fiscal policy for costs that exceed identified revenue sources for the Comprehensive Wastewater Management Plan. Mr. Ells also provides an update on a meeting he attended which discussed emerging contaminants like Per- and polyfluoroalkyl substances (commonly known as PFAS).

Cyanobacteria Notice

WHEN IN DOUBT STAY OUT

Q: WHAT DOES CYANOBACTERIA LOOK LIKE?

A: IT CAN LOOK LIKE PEA SOUP OR A BLUE-GREEN PAINT SPILL ON THE WATER'S SURFACE. THE WATER COULD ALSO LOOK MURKY A BROWNISH GREEN MILKY GREEN OR BLUE.

LEARN MORE AT WWW.BARNSTABLEWATERRESOURCES.COM

As we enter the summer season, we wanted to let you know the Town is planning to resume cyanobacteria monitoring and reporting. However, this program will have a delayed start this year due to unanticipated staff turnover. We expect the program to resume in July. Until this program is back up and running, we wanted to provide some tips to identify cyanobacteria blooms, what to do if you suspect a bloom, and who to contact.

Identifying Cyanobacteria Blooms

The Massachusetts Department of Public Health has provided examples of cyanobacteria blooms with scums and without scums. <https://www.mass.gov/service-details/identifying-cyanobacterial-blooms-and-scums-photographs-of-blooms-and-scums>

How do I know if there is a harmful algal bloom in the water?

Cyanobacteria can cause the water to appear slightly discolored, cloudy, or resemble pea soup or paint. They are usually blue or green but can also be brown or red. They can also give the water a bad odor. The cyanobacteria in some blooms are dispersed throughout the water, while in other blooms they are concentrated in a scum or mat, either on the surface of the water or in sediment along the shoreline.

What if you Suspect a Cyanobacteria Bloom?

WHEN IN DOUBT, STAY OUT!

If you see a possible cyanobacteria bloom, avoid contact with the water.

Contact the Health Department at 508-862-4644 or email health@town.barnstable.ma.us, if the bloom is at a recreational waterbody.

Proper Management of Pet Waste

Do Your "Doody" for Clean Water

You hate stepping in it. And fish hate swimming in it, too! Dogs produce a lot of waste which, if not disposed of properly, can end up in our waterways. Do your part to keep our waters and public areas clean and healthy! Bag your pet's waste and throw it in a trashcan..

DO

DON'T

Did you know that the average dog can produce nearly a pound of waste each day?

- Pet waste left on lawns and in public spaces is not only gross. It can be quite harmful too.
- Pet waste contains twice as much bacteria as human waste!
- If left in your yard, pet waste can kill grass and other plants.
- Adults and children who come in contact with it can get sick.
- When pet waste washes into storm drains and waterways, it can make the water unhealthy for people and wildlife.
- Pet waste in waterways can even cause algae to grow, making the water turn an unpleasant green color.

Do your "doody" in both public areas and in your yard.

To help keep our waterbodies clean and to comply with **Barnstable's General By-Laws (Part I; Chapter 403; Section 403-7 Nuisances Committed by Dogs)**, always carry a plastic bag or other collection means with you when you walk your dog and be sure to pick up your dog's poop and dispose of it in a trash can. Citations and penalties between \$25.00 (first offense) and \$50.00 (second offense) can be issued for failing to meet these requirements.

ROAD WORK UPDATES

As always please slow down and use extreme caution when traveling through the road construction areas and follow posted safety and detour signs.

***New* National Grid New Customer Hookups**

Monday, July 26, 2021 Neuco crews will be working on gas services on Sean's Circle Centerville. Thursday, July 29, 2021 Neuco crews will be working on gas services on Brookshire Road Hyannis. Typical natural gas service installation includes marking out underground utilities within the project area, excavation of the street, laying gas main, relaying customer's individual gas service and connecting those services to the main and installing meters. This project should take about five days to complete. Visit ngrid.com/service line to view a YouTube video explaining the replacement of the service pipe to customer homes. Operations will start promptly at 7:00 AM and run until 3:00 PM. Reduce speed, and use caution. All scheduled work is dependent on weather and/or may be impacted due to an emergency situation.

***UPDATED* Drainage & Pavement Improvements on Wheeler Road in Marstons Mills**

Drainage and pavement improvements on Wheeler Road in Marstons Mills are currently on-going and will continue during the week of July 26, 2021. The remaining work will include the raising of structures to finished grade, final asphalt paving and restoration of all disturbed areas. Please use caution and safe speeds when traveling on Wheeler Road during construction operations.

***CONTINUES* Rendezvous Lane Wastewater Pump Station Replacement Project**

The Town of Barnstable's contractor, Robert B. Our Co., Inc., is under contract to complete a wastewater pump station replacement project at the intersection of Rendezvous Lane, Kent Road and Salten Point Road. The project involves a new below grade precast concrete wet well and valve vault, pumping system, control panel, standby generator and gravity sewer main to replace the existing wastewater pump station at the Town Right of Way to Barnstable Harbor at the end of Rendezvous Lane. The improvements are necessary to replace the existing pump station approaching the end of its intended service life and to relocate the new pump station above the FEMA base flood elevation. Typical work hours are 7:00 AM to 4:00 PM, with groundwater dewatering pumps and sewer bypass pumps occasionally requiring 24/7 operation. Remaining work includes restoration of disturbed areas.

***CONTINUES* Drainage Improvements on Lake Shore Drive in Marstons Mills**

The Town's contractor, Tasco Construction, will continue drainage improvements at five (5) locations along Head of the Pond Rd and Lake Shore Drive in Marstons Mills. The work includes installation of new drainage systems, repairs to existing drainage systems, adjustment of drainage structure castings, and restoration of any areas disturbed during construction. Normal work hours will be between 7:00 AM to 3:30 PM, Monday through Friday. Through traffic will be maintained throughout construction. Any lane closures will be supported with police details to direct traffic. Motorists are advised to seek alternate routes to avoid the construction work.

Hurricane Preparedness

HURRICANE PREPAREDNESS
Be Ready Before the Storm

Hurricanes and tropical storms can impact the entire Commonwealth, not just coastal regions
